

Postgraduate student international network

XP29 project

Reminder

Creation of a post-graduate student international network:

- Identification of students competencies and skills
- Easy relationships between European peer students
- Continued relationships between the students and particularly during their future career
- Keeping contact with teaching staffs for possible future collaboration

Goals

- Link students, teachers, universities and companies - learning community
- Encourage the development of teachers' skills through their peers
- Enable students and teachers to share their experiences
- Help students and teachers to develop their careers
- Identify peers and competencies

Network features

- Exchange of practices and experiences
- Dissemination of job/internship offers
- Show the skills developed by students during their training and in relation to the needs of mechatronic companies
- Highlighting the competency frameworks offered by the 3 universities' courses
- Directories: Alumni / Companies / Schools / Universities

Modalities

- [Linkedin group](#)
- Audience :
